

1. Master System Topology & Data Flow

Next.js 16 Enterprise Frontend <-> FastAPI Gateway <-> LangGraph Multi-Agent <-> Dual Persistence

2. End-to-End 10-Stage Multi-Agent Decision Workflow

Autonomous Pipeline Progression from Job Opening to Day 1 Welcome Kit

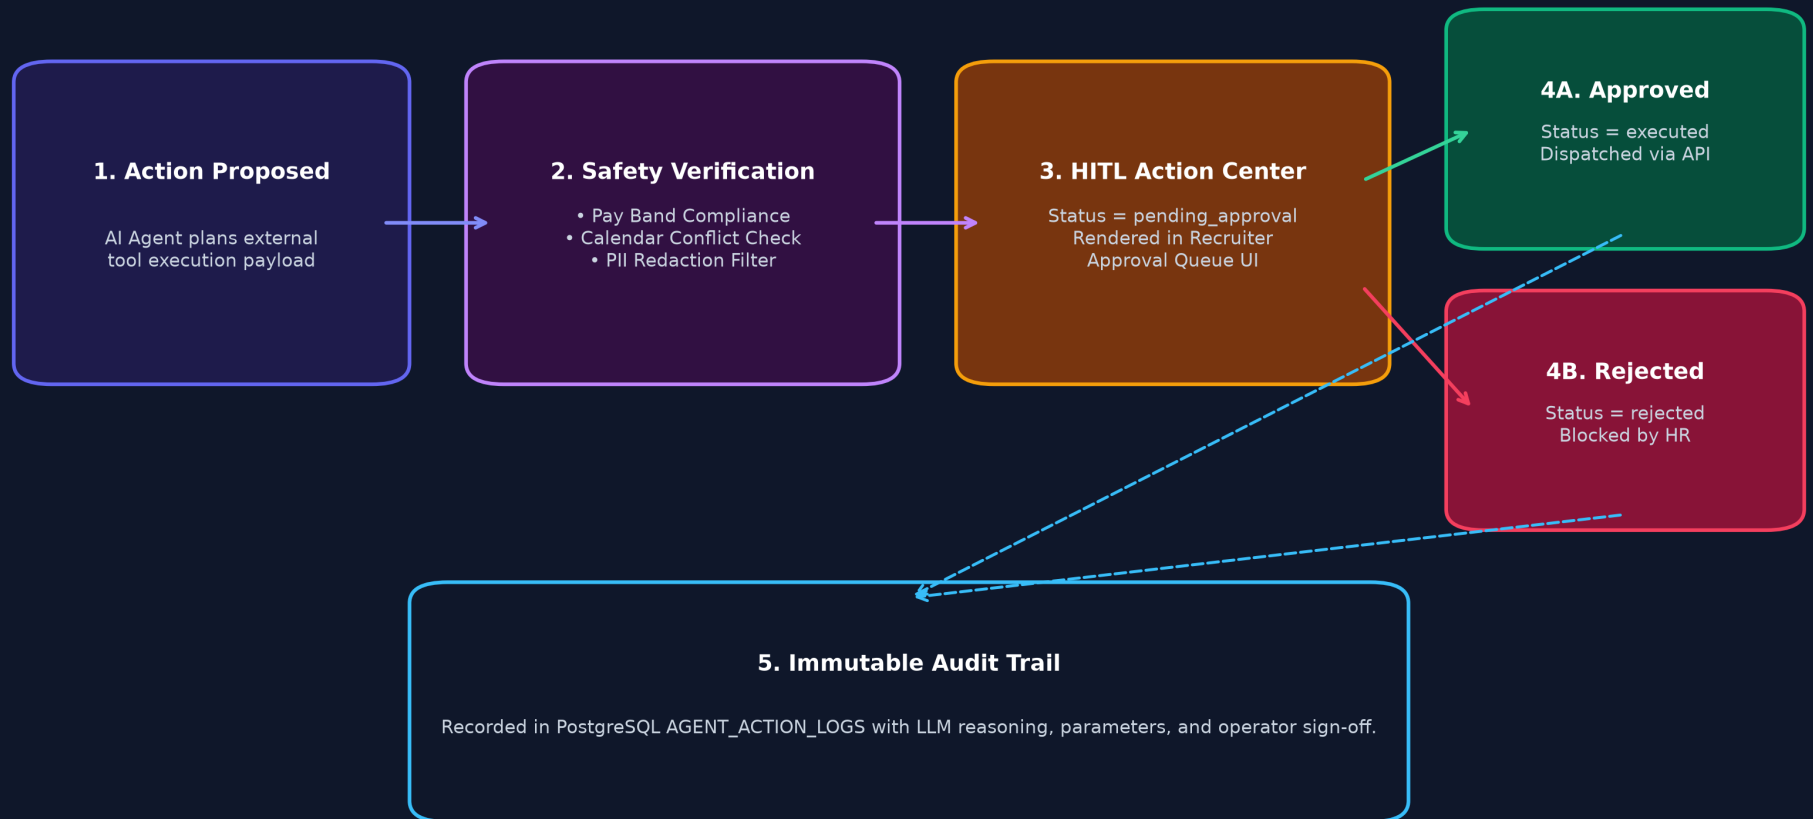

[SAFETY GATE] HUMAN-IN-THE-LOOP (HITL) GOVERNANCE

Zero autonomous execution for external dispatches (Emails, Rescheduling, Offers, BGV, Social Posts). All actions require recruiter approval.

3. Human-In-The-Loop (HITL) State Machine & Safety Guard

State Transitions, Pre-Execution Gate Checks, and Immutable Audit Trails

4. Relational Schema & Vector Store Architecture

PostgreSQL 16 Relational Tables & ChromaDB Dense Vector Embeddings

5. Multi-Modal Ingestion Pipeline & Prompt-Injection Firewall

Adversarial Input Sanitization, Vision LLM Extraction, and Dual Persistence

GROUNDING EVIDENCE & CITATION SAFEGUARD

Every match score and skill claim links directly to line-numbered source snippets in the candidate's resume. Eliminates hallucination in AI candidate evaluations and ensures fair, audit-ready recruiter reviews.
